

HORIZONTAL OR VERTICAL INFRARED OVEN

The company behind the product.

Blasdel is a leading manufacturer of custom heat and motion technologies. Our family-owned company has been designing infrared and high-velocity air ovens, control panels, conveyors, pick and place robots and other specialty equipment since 1982. We treat every company as an individual with unique needs and work with them to find the best solution.

Our new Inspection and Maintenance contracts are our answer to help you keep your Blasdel equipment operating in peak condition for many years to come. Blasdel Enterprises, Inc. is proud to stand behind their equipment.

CUSTOM HEAT AND MOTION TECHNOLOGIES

Infrared ovens may be designed for overhead, spindle, or belt conveyors as well as batch applications. The configuration can be as elaborate as the imagination allows. Ovens can be matched to the contour of a specific product or designed for a variety of parts. Blasdel Enterprises, Inc. insists on conducting process testing to determine the size and type of oven that suits your production requirements. That is your guarantee that you are buying the right equipment.

- Modular construction
- Multiple temperature zones
