BLASDEL ENTERPRISES, INC. would like to introduce you to our line of custom designed infra-red ovens and control panels. Let us put our experience in manufacturing to work in helping you install or upgrade your infra-red equipment.

Infra-red ovens can accelerate virtually any finish. When infrared radiation comes in contact with materials that absorb it, it is converted into heat. Thus the temperature of the absorbing material is raised. No energy is wasted heating air, and the area need not be enclosed. The lack of air circulation also reduces the chance of dirt and dust getting in your finish. Because of its efficiency, **Dial-O-Temp** electric infrared ovens can be an economical asset to your overall production costs and quality.

MODULAR CONSTRUCTION: Dial-O-Temp ovens are custom built from interlocking modular sections available in 1' to 7' lengths. They can be of bolted construction throughout for alterations in capacity or welded for additional strength. Dial-O-Temp ovens adapt inexpensively to your growing business.

MULTIPLE TEMPERATURE ZONES: Dial-O-Temp's unique temperature control system makes it possible to obtain completely different and predetermined temperatures in various sections of the oven. This advanced temperature control technique provides optimum oven processing control.

EXCEPTIONAL ECONOMY: Dial-O-Temp's many design and operating superiorities result in gratifying efficiencies and economies. Very often the cost of operating a Dial-O-Temp oven is considerably less than a gas infrared or convection oven.

WARRANTY: All Dial-O-Temp equipment carries a one year guarantee on parts and workmanship.

ASK FOR A FREE, NO OBLIGATION TEST in your plant or ours. In simulated production tests our factory trained representatives will determine your needs and show you what kind of performance you can expect from a Dial-O-Temp infrared oven. Our production ovens are guaranteed to duplicate the test results.

SAFETY CODES: Dial-O-Temp ovens meet all FIA, FM, CSA and other codes. These standards assure quality and safe operation of your oven.
